Press Release

«DROMEAS produces electrical energy»

Today was held the connection of photovoltaic parks of DROMEAS S.A. Group, in the Industrial Area of Serres, with the network of PPC (Management of Greek Electricity Networks).

The photovoltaic park of 1.5MW productive power, was designed and performed successfully within record time (1 month), the energy construction company K.E.A. Energy, established in Serres.

The above investment meets the basic option and philosophy of the company DROMEAS for technological investment combined with environmental protection.

The Board of Directors
