

A.1 Technical Data

A.1.1. Sofa with sound-absorbing high sides.

A.1.2. The seat is made of wood (25 mm) and is mounted on a metal frame made of INOX-mirror round steel tube with a 26mm diameter and 2mm thickness. The sound-absorbing back and sides are attached on the seat. All components are covered in expanded polyurethane foam and are upholstered with material chosen from the DROMEAS fabric catalogue.

A.1.3. The high side panels are placed in a Π-shape around the sofa offering isolation and sound absorption. In particular the panels are covered with sound-absorbing 15mm thick foam and upholstered with a sound-absorbing fabric chosen from the corresponding DROMEAS fabric catalogue.

A.1.4. The legs have height-adjustable plastic glides for floor protection.

Packaging: 1 piece 2-seater (dimensions 1640X850X1400Hmm)

Weight: 2 m³

Packets: 1
