

DROMEAS

NEO D

Sliding surface

It is divided into two parts, mobile and fixed. Along and between the two surfaces there is a brush that allows cables to pass through the cable channel that is embedded in the office.

Surface

Three-layer chipboard with 25 mm thick natural veneer or melamine

Adjustable feet

Adjustable height 650-850mm. Telescopic operation, painted with electrostatic paint

Side pedestal

900x450x566H, acts as a support on a selection side

Restorers

For smoothing floors 0-25mm
