

# DROMEAS

## SOFIA

---

### Frame

The seat, back and arms are made of 25mm thick E1 three-layer chipboard. They are lined with medium hard foam and double sided with upholstery of choice.

### Height adjustment

Seat height adjustment is achieved by a gas piston, which is activated by a lever located underneath and laterally on the seat.

### Base

660mm die-cast polished aluminum 5-star base with twin wheels made of reinforced thermoplastic material (polyamide).
