

**DROMEAS S.A**

**PROCLAMATION OF TENDER**

**INDUSTRIAL DESIGN OF OFFICE AND HOUSE FURNITURE**

Our world is changing at a rapid pace. Far more rapid than we can assimilate, understand, manage. The changes we experience affect the way we think, the way we have fun, the way we live, the way we work. They change the requirements in the spaces in which our everyday life takes place, but also the objects that surround it and support it. The rapid advances in digital technology have brought about significant changes in the organization of living, cohabitation, work and recreation that directly affect the spaces and objects we use in them. Part of the work is transported away from the typical places it usually takes, while pleasure and leisure time management diffuse into many places and times. Within this ever-changing environment, the demands of the objects we use in the spaces are radically changed. We need new items to meet these new needs. Moreover, a modern need that has become imperative and not only to meet the needs of everyday life, but the future and the living of the coming generations is that of environmental protection. Both the materials and the way of production of modern furniture must take this parameter very seriously and amenably.

In the light of all the above we want modern furniture to be more flexible, easily adaptable or convertible, polymorphic, more ecological, more ergonomic, more economic but at the same time especially personal, otherwise capable of expressing the uniqueness of the persons using them while exhaling aesthetics.

The office furniture company "DROMEAS SA" in its effort to monitor, listen and respond to the needs of modern man and wishing to contribute to the promotion of the importance and the consolidation of the importance of the industrial design of products for industrial production and by extension, for the development of the country, as well as to provoke the relevant interest.
