Press Release

«Informing Investors of Papapanagiotou S.A. “DROMEAS”»

On March 9, 2017 our company announced a cooperation agreement with BISLEY Company at Newport (Great Britain) signed on March 8, 2017.

BISLEY is a company producing metal frames of different types and utilities. It is a world-renowned company active in more than 50 countries.

The agreement still exists, however, due to problems caused by the procedure of leaving European Union “Brexit” to all companies active in Great Britain, the company has low absorbency and the cooperation continues through the subsidiary company of Bisley in Germany.

The ultimate action of the signed contract will be decided in the future and will depend on the decisions of both companies Board of Directors, after the final agreement or not for the Brexit and according to it.

At any case, Papapanagiotou S. A. “Dromeas” will inform its investors about the progress of the cooperation, as well as anything important that may concern the company’s course.

The Board of Directors
